

Healthy and innovative green asparagus from Veneto, Italy

Cultivated with cutting-edge biological techniques in greenhouses with ground heating through hot water, to anticipate the production of over 50 days.

All our products are organic.

We work for the highest quality

Only the best asparagus are selected for sale, both by personnel and automatic calibrators. Treatments with sanitized water, stock areas with controlled temperature and shipment in hours after the harvest, will guarantee to consumers a tasty product rich in quality.

We aim to be your professional partner, not just a supplier

A long-term vision, precision in the communication and documentation, the respect for deliveries, are our strengths. Moreover, we are available in working with customized labels, packaging, graphics and texts.
